

Three Years of Partnership, Togetherness & Impact

“Together, we started with a vision, grew through teamwork, and created meaningful impact.”

Ashraya Hastha Trust (AHT) and eVidyaloka Trust mark three years of a strong and meaningful partnership, united by a shared commitment to bringing quality digital learning to students. Over the years, this partnership has grown through the collective efforts of volunteers, schools, field teams, and partners, creating opportunities for students to learn, participate, and grow with greater confidence. Together, we have seen meaningful progress in students' learning, attendance, engagement, and overall participation.

Watch how three years of trust, collaboration, and shared purpose have translated into meaningful action, showing what we can achieve when we come together to create lasting impact for children.

Deloitte & eVidyaloka Partnering to Expand Digital Learning

A new chapter in collaborative learning began with the inauguration of the eVidyaloka Digital Classroom Program (DCP) at KGBV Maharajganj Sadar, Uttar Pradesh. The event brought together Deloitte, government officials, Swabhimana Samiti, and eVidyaloka, with Ms. Saraswathi Kasturirangan, Chief Happiness Officer, Deloitte, as Chief Guest and Ms. Priyanka Sahai, CSR Lead, Deloitte, as Guest of Honour, alongside district officials Mr. Aman Pratap Singh, Mr. Krishna Kumar Singh, and Mr. Bansidhar Singh, school representatives, and the respective teams.

Grade 8 students actively participated and interacted with the guests, marking the beginning of their digital learning journey. Government representatives and stakeholders appreciated the initiative and expressed interest in expanding eVidyaloka classes to schools in the region.

Celebrating Independence Day at eVidyaloka

Independence Day was celebrated with great enthusiasm and patriotic fervour across eVidyaloka schools, bringing students together to learn, reflect, and celebrate India's rich history, freedom, and heritage. Through engaging educational sessions, students explored India's journey to independence and learnt about the invaluable contributions and sacrifices of the freedom fighters who shaped the nation's history. The celebrations came alive through drawings, posters, artwork, and a range of engaging activities inspired by India's culture, national symbols, and heritage.

Beyond the celebrations, the occasion gave young learners an opportunity to express their creativity while deepening their understanding of the value of independence. To capture the spirit of the day, eVidyaloka also released "The Freedom We Share", bringing together vibrant visual from the ground, reflecting on freedom, learning, and what it means to be part of India's journey forward. The celebrations and shared stories reflected a strong sense of patriotism, national pride, and hope for the future.

Celebrating National Sports Day Across eVidyaloka Schools

National Sports Day brought plenty of energy, laughter, and team spirit to eVidyaloka schools as students came together to celebrate the joy of sports and staying active. The day featured fun-filled activities such as Sports Dumb Charades, where students acted out different sports for their teammates to guess, and Pick and Speak, which encouraged them to choose a topic and speak about it with confidence. The activities kept students engaged while giving them opportunities to think on their feet, communicate, participate, and cheer each other on.

More than just a day of games, the celebrations highlighted how sports can help young learners develop valuable life skills. Through friendly participation and teamwork, students experienced the importance of discipline, dedication, perseverance, confidence, and collaboration. The day was a lively reminder that learning can happen beyond the classroom too!

Class Assistants Come Together Across States for Learning & Team Building

Across the states of Jharkhand, WB, and UP, in-person class assistant training was conducted with the support of on-ground partners SPS (Samajik Parivartan Sansthan), CESR (Centre for Environmental and Socio-Economic Regene), and Swabhiman Samiti. The sessions focused on learning, experience-sharing, and strengthening programme implementation. The sessions created opportunities to discuss field experiences and challenges, refresh their understanding of their roles, and build stronger communication and teamwork through interactive activities. Engagements across the three states strengthened collaboration, built a stronger sense of connection among Class Assistants, and helped equip them to support the continued delivery of eVidyaloka's online classes.

LTIM Impact Assessment Insights from the Field

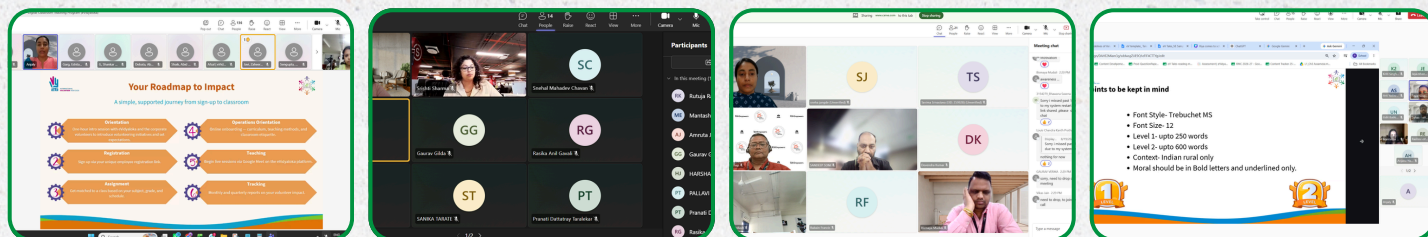

An Impact Assessment was conducted across selected eVidyaloka schools to understand the implementation and impact of the Digital Classroom Program supported by LTIM. Interactions with Headmasters, teachers, students, Class Assistants, and SDMC members highlighted positive changes in student engagement, attendance, conceptual understanding, and academic support.

The assessment also offered valuable insights to further strengthen digital learning, including the need for more activity-based learning, wider access to Digital Classrooms, and greater use of local languages to support better understanding.

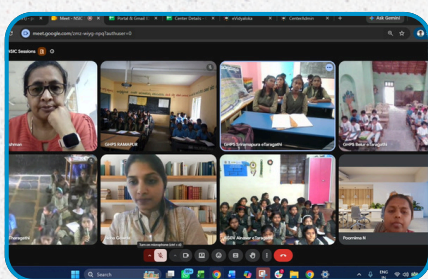

Strengthening Corporate Volunteer Engagement

This month, volunteers from Cognizant, Signify, Brillio, Tata Consultancy Services (TCS), and Bajaj Group participated in orientation sessions to begin their volunteering journey with eVidyaloka.

The sessions introduced volunteers to the Digital Classroom Programme, teaching, STEM learning, and content development, while helping them understand their role in creating meaningful learning experiences for rural students. Each orientation marked the beginning of a new chapter of collaboration and impact.

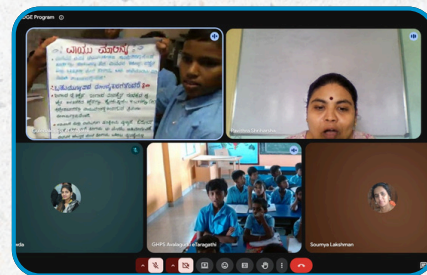

NSIC Season 10 Begins Across 13 States

The National Student Innovation Challenge (NSIC) Season 10 began on 15 August, bringing together students from 13 states to explore ideas, identify community challenges, and work towards innovative solutions. With the initial sessions now underway, students have started their journey of learning, research, and ideation, setting the stage for an exciting season of collaboration and innovation.

EDGE Begins Across 11 States

The National Student Innovation Challenge (NSIC) Season 10 began on 15 August, bringing together students from 13 states to explore ideas, identify community challenges, and work towards innovative solutions. With the initial sessions now underway, students have started their journey of learning, research, and ideation, setting the stage for an exciting season of collaboration and innovation.

Strengthening Ground-level Collaboration

eVidyaloka held a formal meeting with the newly appointed District Education Officer (DEO) of Giridih to introduce the organisation and share an overview of its various programmes in the district. The meeting provided an opportunity to discuss eVidyaloka's work in strengthening access to quality digital education and supporting students in government schools.

When Learning Becomes a Habit: A Journey of Discipline and Curiosity

At one eVidyaloka school, regular Digital Classroom sessions are helping students build stronger habits of learning. From improved attendance to greater participation, students are becoming more curious, confident, and eager to learn

What began as regular online classes gradually became something students looked forward to. They started arriving early, preparing the classroom, asking questions, completing their homework, and participating more actively with their Volunteer Teachers. These small but meaningful changes reflect a growing sense of discipline, confidence, and ownership of learning. [Read the full story.](#)

Learning Electricity Through Hands-On Experimentation

At GHS Maharatha, a Grade 8 science lesson on electricity went beyond the textbook as students explored electric circuits through a hands-on experiment.

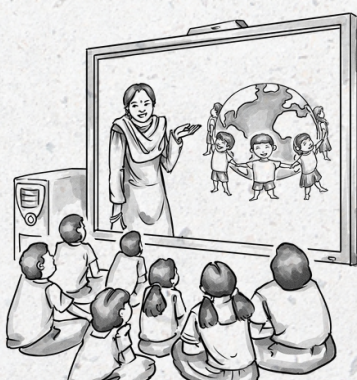

With guidance from Volunteer Teacher Harihar Panigrahi, students assembled a simple circuit using a battery, bulb, and wires, discovering for themselves how a complete circuit makes the bulb glow. The activity encouraged students to observe, experiment, ask questions, and learn by doing, turning a complex concept into an exciting moment of discovery. [Read the full story.](#)
